SUMMARY

Back-end developer with 1.5 years of experience in building web applications using Golang and modern tools/frameworks. I am interested in building usable, useful, well-constructed websites and applications.

EXPERIENCE

Back-end developer

2022 – Present

Freelance

Remote, Russia

- Optimized back-end applications
- Developed REST API
- Created an email newsletter
- Added new features to existing application

PROJECTS

YouTogether | *Golang, PostgreSQL, Redis, OpenAPI, Docker, Github Actions, WebSocket*

2023 – Present

- Made up the database structure
- Closely collaborated with front-end developer to meet the functional requirement
- Designed application API using OpenAPI specification
- Developed RestAPI with clean architecture
- Managed CI/CD by Github Actions and Docker
- Designed the interaction of the server and the user over the WebSocket connection

ACTIVITIES

Leaders Digital Transformations 2023–7th place | *Golang, PostgreSQL, Redis, OpenAPI, Docker, CI/CD*

2023 June

- Made up the database structure
- Set tasks for all team members based on functional needs
- Created Swagger generation
- Developed REST API with clean architecture
- Managed CI/CD using Github Actions and Docker
- Calculated the approximate cost of the future enterprise
- Generated a PDF file from html template

EDUCATION

Voronezh State Technical University

Voronezh

Computer Systems, Information Technology and Programming

2021 – 2025

TECHNICAL SKILLS

Languages: Golang, Java, SQL, HTML

Databases: PostgreSQL, MySQL, Redis, MongoDB

Libraries: Gin, Ent

Specifications: OpenAPI, AsyncAPI

Development Tools: Git, Docker, VS Code, IntelliJ, CI/CD
